

LAWN CARE CALENDAR

FEBRUARY/MARCH

Early Spring: Apply bio-nutrients, fertilizer and targeted weed control.

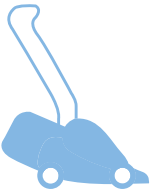

BENEFITS: Pure Green will apply fertilizer and bio-nutrients to really give your lawn a nice green color, along with a crabgrass prevention and targeted broadleaf weed control.

ROUND 1

MAY/JUNE

Late Spring: Apply bio-nutrients, fertilizer, and targeted weed control.

BENEFITS: Pure Green will help the turf endure the stresses of summer like disease and drought by improving the cell structure of the grass and increasing root vitality. Of course, while we are there we will take care of any pesky weeds.

ROUND 3

JULY/AUGUST

Summer: Apply bio-nutrients, fertilizer and targeted weed control.

BENEFITS: Pure Green is promoting key nutrients to help your turf deal with and recover from summer stresses. We are also focusing on those pesky grassy weeds that will come up this time of the year.

ROUND 5

NOVEMBER/DECEMBER

Winter: A customized visit with bio-nutrient fertilizer and targeted weed control or our proprietary organic fertilizer. If you chose to aerate and over-seed in round 6, we will simply spot treat weeds.

BENEFITS: Our proprietary organic fertilizer develops and strengthens the grass plant and root system. If you opted out of the aeration-seeding process, our bio-nutrient fertilizer package and targeted weed control gives great color and health going into winter.

ROUND 7

MARCH/APRIL

Spring: Apply bio-nutrients, fertilizer and targeted weed control.

BENEFITS: Pure Green will promote that deep green color that everyone loves, at the same time reducing the amount of nitrogen and pesticides used by traditional methods this time of the year.

ROUND 2

MAY/JUNE

Late Spring: Apply a bio-nutrient application that addresses grub control and surface feeding insects.

BENEFITS: Pure Green is equipping your lawn to deal with summer heat as well as taking care of any weeds that we see.

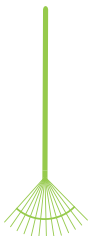

ROUND 4

SEPTEMBER/OCTOBER

Fall: A customized visit with bio-nutrient package and targeted weed control or our proprietary organic fertilizer. Also, time for aeration and over-seeding.

BENEFITS: This is an exciting time of year for your lawn! Pure Green recommends aeration combined with over-seeding to relieve soil compaction and to introduce improved varieties of grass into your lawn. If you choose not to aerate and over-seed, you will receive our bio-nutrient fertilizer package and targeted weed control.
